Cozy POS

Cozy POS is a Point of Sale software for various business verticals in Retail, Restaurant, Salon & Spa. Its flexible architecture, custom billing and ordering layouts make it easier for business owner to implement as per the need. Please checkout the feature sections of this website to know more about CozyPOS.

Cozy POS Billing and Inventory Management Software is designed to work on a single system or on network in a outlet with an optional integration to cloud architecture to enable cloud Back Office, ERP, Reports for easy of access to outlet data through web or mobile. Cloud integration works through smart sync architecture to enable near real time data availability on the cloud.

Cozy POS supports integrations to external software services such as Customer Loyalty, Payment Processing, Enterprise ERP, HR/Payroll portals, Financial accounting systems. CozyPOS architecture supports direct integration as well as integration through integration platforms such as POS Wings.
